

AVOOVA CANDLE

Our luxurious scented candles are housed in Faberge-type eggs. They're both enduring and collectible – decorative boxes in which to keep little treasures once the candle has burned through. Each egg-shaped ceramic container has been trimmed in pewter, meticulously inlaid with ostrich eggshell, and then filled with premium wax in one of our four scents - all inspired by African botanicals.

MATERIALS & CONSTRUCTION

- Ostrich egg shell inlay
- Pewter
- Ceramic glazed interior
- Cork agglomerate non-slip base
- Gift box, pouch & care card

DIMENSIONS

3.5" Dia. x 4.75" H

OPTIONS

- Acacia Plains- Green
- African Rainforest- Blue
- Kalahari Moons- Tan
- Namaqua Lands- Grey

DISCLAIMER

AVOOVA products are hand crafted originals. Slight variations in color, size and pattern are intrinsic to the style and character of each piece.
Burn time approximately 45 hours.

AVOOVA

KAROO SOUTH AFRICA

AVOOVA SCENTED CANDLES

The scented wax candle in this AVOOVA egg was made for the company by Wild Olive African Artisans, at the foot of Table Mountain in Cape Town, South Africa. It is 100% natural and made from Soy Wax.

AVOOVA TRINKET BOX

Please note that once your candle has burnt down, your AVOOVA ceramic egg has a glaze finish to the interior and can continue to be used for decorative and storage purposes.

If the candle has burned correctly, there should be little residual wax. To remove the residual wax from the container, add hot water (not boiling) and allow to loosen, then remove and wipe clean with a dry cloth.

SAFETY RULES AND INSTRUCTIONS FOR USE

Make sure your first burn does not last less than 3 hours.

In order to obtain an optimum burn, you should always allow the entire surface of the candle to become molten; this ensures an even burn and prevents tunneling.

Always keep a burning candle within sight.

Never burn a candle on or near anything that can catch fire.

Place candles away from drapes, bedding, carpets, books, paper, flammable decorations, etc.

Keep the wax pool free of wick trimmings, matches and debris at all times. Keep burning candles away from drafts, vents, ceiling fans, and air currents, as this can result in an uneven burn. However, always burn the candles in a well-ventilated room.

Never touch or move a burning candle when the wax is liquid.

Extinguish by blowing out, and never with water, unless the candle is finished.

Be aware that wax melts at over 46 C, therefore it is inadvisable to leave your candle in the car or exposed to any other heat sources.

Do not leave this product on a window seal or exposed to direct sun light.

POSSIBLE CONCERNS

A well-made candle should not create any smoke when burning; however, if the wick becomes too long or an air current disturbs the flame then small amounts of smoke (unburned carbon particles-soot) can become visible. This soot is not harmful as the waxes used to make our candles come from natural and refined oils and do not contain or "wet spots" can occur on the top layer of your candle, this happens because the wax that we use is very heat sensitive. This does not, in any way, affect the quality of the candle or your experience.

Some fragrances could smell stronger than others due to the nature of the fragrance materials used. Some candles may vary in color, depending on age or fragrance used – this does not affect the quality of the candle.

Please note, that from time to time, certain fragranced candles do not use all the way while burning, especially when usage instructions are not followed. This is due to the high content of perfume in the candles that can change the melting point of the wax. Please ensure that your candle's wick is always centered when the candle reaches the bottom half of the container.

CARE FOR YOUR AVOOVA PIECE

Ostrich eggshell is water resistant and will withstand normal domestic hot and cold temperatures. It can be cleaned with a warm soapy water and a soft cloth. For decorative pieces, an occasional polish with furniture wax or silver polish will restore the luster in no time.

THINGS TO AVOID

Avoid immersing completely in water.

Avoid leaving in direct sunlight for extended periods.

Never clean with liquid/powder bleach, abrasives or wire wool.

Never put an AVOOVA piece in a dish washer or microwave.

Do not use Brass Polish or coarse fabrics to polish.

Avoid any contact with solvents.
